A: The classic B2B solution for the business to business version of your problem is to use a custom solution or build on top of an ERP system. For example: If you use a CRM/ERP system (like Salesforce), you could automate the mail merge mailing portion by extracting the data needed from one of your saved leads (or whatever) and then use that information to populate the mailing. If you need to do this manually, then there are numerous software packages that provide the functionality, such as, Mail Merge (Word 2010), Outlook 2010 (All versions)

Club Management

The software was developed to help organizations and associations of any type to easily manage their membership lists, generate reports and handle all kinds of payments.
